

High-chance portions — geo-world

Combined original study articles for this topic's highest-probability PYQ themes (deep edition).

World Regions, Resources & Strategic Straits

~28% · [Strategic locations](#) · [Climate regions](#) · [Resources](#)

Why UPSC asks this

Lower volume but high surprise — maps and CA-linked geography.

Strategic geography

Choke points for energy and trade; Arctic routes as emerging theme; resource regions (oil, copper, rare earths) in CA context.

Climate regions

Köppen groups at overview level; mediterranean, monsoon, tundra signatures for matching vegetation/soil questions.

Must remember

- Malacca, Hormuz, Bab el-Mandeb, Suez, Panama — why they matter
- Major desert belts along horse latitudes

Educational prioritisation heuristic — not an official UPSC prediction. © UPSC IAS Study Hub original notes.
